

Title: House Price Prediction

Project description:

This project demonstrates a machine learning-based house price prediction system using Streamlit. Users enter house features such as (bedrooms, bathrooms, lot area, built year, grade, etc.) and the app returns an estimated price (in ₹ and in Lakhs).

Model Performance Comparison Chart Using (R^2 Score):

Prediction result:

The screenshot shows a web application titled "House Price Prediction". On the left, there is a form titled "Enter House Details" with the following inputs:

- Bedrooms: 2
- Bathrooms: 2
- Lot Area (sq ft): 5000
- Built Year: 1990
- House Grade: B

A "Predict Price" button is located below the form. On the right, there is a large image of a modern house. To the right of the image, a green box displays the "Estimated Price : ₹ 1,125,161" and "≈ 11.25 Lakhs". A green banner at the top right says "Prediction Completed!". At the bottom, a yellow warning message states: "This is an estimated price based on your inputs. Market conditions may affect the actual value."
